INTRODUCTORY.

IN presenting this work to the public I take great pride in stating that it is the result of close observation and study of the proper method of preparing and serving drinks, as well as my personal experience of twenty years behind the bar in some of the most exclusive cafes in Massachusetts, Rhode Island, New York, Maryland, New Jersey, Illinois, Minnesota, and Washington, D. C., and embodies all the well-known and popular drinks known to the trade, and a number of new and original ones, by the author, heretofore unpublished, but served by him in such well-known hostelries as the Parker House in Boston, famous the world

over for the deliciousness of its cocktails, punches, and other mixed drinks, and for the excellence of the service.

In reference to my personal experience will say I began my career as bell boy in the Lincoln House in Worcester, Mass., in 1882, and from the start devoted strict attention to the bar business, which soon resulted in procuring me the position of bartender, which vocation I have since followed, and have exerted every energy to have the art of mixing drinks brought to the stage of perfection. I now take pleasure in presenting the result of my experience, study and research to the public in a concise manner, enabling them to prepare a palatable concoction, and serving it in an appetizing form.

In order to produce the most satisfactory results the best ingredients should be used in every instance, and if this is done, you will have a delicious concoction from every formula herein contained. I do not wish to pose as the only exponent of the art of mixology, but desire to impress the importance

of the following apparently insignificant details, which should be closely followed:

Always have glass and silverware dry and polished.

See that trays are clean and dry.

When dry cocktails are ordered, never use a cherry or olive unless customer especially requests it.

In squeezing lemons for bar use, strain through fine sieve or cheese-cloth, so that concoction will not appear cloudy.

In mixtures where ice is used in serving-glass, care should be exercised to have it clean and clear.

Do not fill serving-glass so it will overflow.

Where draught beer and ales are used the pipes should be frequently and thoroughly cleaned, and faucets kept polished.

In drinks where limes or lemons are used, extreme caution should be exercised to avoid having seeds in serving-glass.

In preparing hot drinks of any description, the serving-glass should be thoroughly

rinsed in hot water, and a spoon placed in glass, so as to minimize the risk of breakage and enable you to serve the drink thoroughly hot.

Bottled liquors of all descriptions should be kept lying down so as to keep the corks moist and avoid evaporation.

Have your glass and bar towels clean.

Bitters and cordials of every description should be kept in the original bottles, with the labels clean and attractive, and should never, under any circumstance, be refilled.

When patrons request cigars instead of drinks, always serve them in a glass if silver tray is not available.

In conclusion, will add it is hardly necessary to enumerate the various little details which every bartender should be familiar with, but will merely suggest keep everything connected with your bar and back bar thoroughly clean and attractive, and you will procure the patronage of the most desirable class of customers, and be enabled to serve them with mutual satisfaction.

Very truly yours,

TIM DALY.

UNIONISM THE FUNDAMENTAL PRINCIPLE OF EFFICIENCY.

AM a firm believer in unions, as they tend to improve the condition of their members financially as well as socially, and insure to proprietors employing members thereof competent and reputable men.

My personal connection with the Bartenders' Union for a number of years has convinced me of the utility of organizations of that nature, and since 1889, when I proposed forming a local union in Worcester, Mass., and in which the outlook was very auspicious until after the election, which resulted in no license, I have been a strong adherent to the cause. Our Union has been the means of elevating the bartender to the same social standing as men in other professions whom necessity requires to earn their living. Not

only this, but the Union has brought about a feeling of affiliation among our members which naturally benefits their employers, from the fact that bartenders no longer harbor feelings of jealousy or antipathy toward each other, which, in the past, resulted in their making disparaging and detrimental remarks concerning competitors' stock, eac.

Fraternally yours,

TIM DALY.
